Template: Anna Wróblewska (Warsaw University of Technology), adapted from the ACL 2015 conference formatting template.

Reproducibility checklist

Overall results:

- MODEL DESCRIPTION – A clear description of the mathematical setting, algorithm, and/or model
- LINK TO CODE – A link to a downloadable source code, with specification of all dependencies, including external libraries
- INFRASTRUCTURE – A description of the computing infrastructure used
- RUNTIME PARAMETERS – Average runtime for each approach
- PARAMETERS – The number of parameters in each model
- VALIDATION PERFORMANCE – Corresponding validation performance for each reported test result
- METRICS – Explanation of evaluation metrics used, with links to code
- **SEEDS** – Random seeds used for each reported run, so the exact run can be reproduced
- **EXACT COMMANDS** – The exact command(s) or script used to produce the main reported result, with library/package versions

Multiple Experiments:

- NO TRAINING EVAL RUNS – The exact number of training and evaluation runs
- HYPER BOUND – Bounds for each hyperparameter
- HYPER BEST CONFIG – Hyperparameter configurations for best-performing models
- HYPER SEARCH – Number of hyperparameter search trials
- HYPER METHOD – The method of choosing hyperparameter values (e.g., uniform sampling, manual tuning, etc.) and the criterion used to select among them (e.g., accuracy)
- EXPECTED PERF – Summary statistics of the results (e.g., mean, variance, error bars, etc.)

Datasets – utilized in the experiments and/or the created ones:

- DATA STATS – Relevant statistics, such as the number of examples
- DATA SPLIT – Details of train/validation/test splits
- DATA PROCESSING – Explanation of any data that were excluded and all preprocessing steps
- DATA DOWNLOAD – A link to a downloadable version of the data
- NEW DATA DESCRIPTION – For new data collected, a complete description of the data collection process, such as instructions to annotators and methods for quality control
- DATA LANGUAGES – For natural language data, the name of the language(s)
